Education

Minnesota State University Mankato **Aug 2022 - May 2026**

Bachelor of Science in Computer Science, ***GPA: 3.74*** *Mankato, MN*

- Relevant Coursework: Operating Systems, Intelligent Systems, Parallel Computing, Software Engineering, Security, Databases, Computer Architecture, Algorithms, Data Structures, Prompt Engineering

Technical Skills

Languages: Java, Python, TypeScript, Kotlin, C#, SQL, CSS/HTML
Frameworks/Libraries: Android Studio, Django, Next.JS, React
Tools/Platforms: Firebase, MongoDB, Postgres, Azure DevOps, Docker, Git, GitHub actions, Linux, Unix
AI Tools: Claude Code, GitHub Copilot, Cursor

Experience

Software Engineer & CTO **Feb 2026 – Present**

TableTap *Remote*

- Architected and shipped a full-stack, multi-role ordering and POS platform with QR-based guest ordering and JWT-secured, role-gated access.
- Built real-time order updates using Django Channels and Redis WebSockets across concurrent kitchen and POS sessions.
- Drove development by building custom AI agents and automations for code review, audits, and test generation.

IT Lead Consultant **Aug 2023 – May 2026**

Minnesota State University *Mankato, MN*

- Led and mentored a team of **30+** consultants, implementing structured check-ins and workflow tracking that improved team collaboration efficiency by **25%**.
- Resolved hardware and software issues for **200+** users monthly, reducing average downtime by 15% through troubleshooting and root cause analysis.
- Diagnosed and resolved **50+** monthly support tickets, decreasing resolution time by **30%**.

Software Engineer Intern **May 2024 – Aug 2024**

Client Sponsored Project *Mankato, MN*

- Architected, built, and tested an automated shift scheduling system for **30+ staff** in a professional coding environment, reducing manual scheduling time by **80%**.
- Built a cross-platform desktop application using Java and Gradle with object-oriented design, streamlining workflows across macOS and Windows.
- Integrated Microsoft Teams and Excel APIs to automate schedule distribution, decreasing communication overhead by **75%** for a 30-member team.

Projects

SAFEHR | *NextJS, TypeScript, Django, SQLite, MongoDB* **Jan 2025 – Dec 2025**

- Engineered a full-stack, role-based platform supporting Admin, Educator, and Student workflows with secure access controls.
- Designed and built RESTful APIs with Django and integrated MongoDB for efficient data storage and retrieval.
- Deployed a scalable, Dockerized architecture with separate dev and prod environments; implemented real-time updates via WebSockets for multi-user use.
- Developed automated unit and integration tests achieving 85%+ coverage, improving reliability and reducing regression risk.

AutoShift | *TypeScript, Vite, Electron, CSS* **Jan 2025 – May 2025**

- Built a cross-platform Electron + TypeScript desktop app automating shift logging for 15+ university staff, reducing manual workload by 90%.
- Designed a Selenium + ChromeDriver automation framework for timesheet entry, reducing data entry errors by 80% and saving each user 1 hour per week.

Leadership and Activities

ColorStack MNSU | *Vice President* **May 2025 - Present**
MNSU Leetcode Club | *President* **Aug 2025 - Dec 2025**
CodePath | *Student fellow* **May 2023 - Dec 2024**
